**A New Day in Prices and
Quality**

INTRODUCTION

In placing this list in your hands, we hope to help you solve some of your buying problems for the season 1935-1936. We have enlarged our plantings extensively this season, and have an assortment of good, thrifty, young stock that should appeal to every progressive nurseryman in both quality and price.

It is true that many desirable items are not on our list but we offer no apologies for that. The acute shortage and steady demand of last season completely wiped out some of the best items, even to the last lining out plant. It is probably not good policy to clean up on anything, but we go the limit rather than ship orders short on best stock.

We wish to express our appreciation for your patronage the past season. Many new customers have been added to our list, and we have put forth our best efforts toward your satisfaction. Many of you have sent duplicate and repeat orders and we feel that our sincere efforts to give you something for your money have produced results that have been of mutual benefit.

Naturally, in every season's shipments there are some claims for adjustment. We believe that every customer who has had such a claim will bear us out in the statement that every just claim has been adjusted. These claims have been very few, and as long as this privilege is not abused you are assured of protection in this way.

One feature of this list we wish to call your attention to is our method of handling collected, or woods grown, stock. Seeing the acute shortage in much of the stock in this class, we offered this as a supplement to our Spring 1935 list. Also knowing the average quality that has been shipped in the past and the "grief" that it has caused, we attempted and succeeded in raising the quality by regrading and culling in our storage every bundle that was shipped. This policy has cut our margin of profit, but we believe it is the only way this can be handled with any satisfaction. Consider this when buying collected stock, remembering that you are not paying for the culls that we burn, neither are you paying the expense of packing, transportation, etc., on something that has no roots. Yet our prices are in line.

Another feature of our collected stock is selected plants. This method of listing is original with us, and we believe that no other concern selects this quality of stock with the care that we take. This is a substitute for nursery grown stock, and, in many instances, is fully as good. The selections can be made from millions of plants and trees, and only the best are selected. The natural law, "The survival of the fittest," takes care of the weaklings, and we have nothing invested in poor quality, so you do not have them to buy to get some good stock. We also offer varieties that are not on the market in quantities. If our efforts in this way have helped you, we are glad. If you need our efforts, we will also be glad to hear from you.

Remember your planting problems are our problems, if you pass them along to us. If in any way we can advise or help you in regard to the planting or care of any of the stock listed, that is part of our service. Our wish is, another good season, only more of it.

TO THE TRADE

We have exercised greatest care in making prices in this list. Due consideration is given to the buyer who handles quantities. Prices are based on cost of production and handling and any State or Federal taxes that may be levied will be added. Prices are f. o. b. McMinnville, Tenn.

TERMS.

Five per cent discount and free packing for cash with order. Two per cent within ten days from date of invoice, one per cent thirty days, or net sixty days.

If you are a new customer with us, please send bank or trade reference, allowing sufficient time for a report. Credit will be extended cheerfully if your record is worthy. If you prefer C. O. D. shipment, a remittance of twenty-five per cent of your order must accompany it.

PACKING, TRANSPORTATION, ETC.

Boxing and packing will be charged for at actual cost. Transportation charges are to be paid by customer, unless otherwise agreed. Please specify mode of transportation, place of destination and routing if possible. If not specified, we shall use our best judgment.

GUARANTEE OF STOCK.

We endeavor to send out good, thrifty stock that is true to name, and are ready at any time to replace to the amount of the purchase price, on proper proof, any stock that may be otherwise. But under no circumstances will we be responsible for more than purchase price.

ERRORS AND CLAIMS.

In order to have consideration, your claims for errors must be made within ten days after receipt of stock. Plants become your property when received by transportation company, and we shall not be responsible for loss or damage in transit.

Please accept our shipments promptly, as such items as evergreens, etc., are not packed for storage, but transportation only. Unpack shipments promptly and give us a report.

TRUCKLOAD AND CARLOT SHIPMENTS.

Special rates can be made for truck load deliveries from our nursery. A liberal discount will be allowed also on bulk shipments.

NAMES.

Plant names are taken from Horticultural Standardized Plant Names as far as possible to be consistent with established trade practice.

GRADING.

This will be done as near standards adopted by the American Association of Nurserymen as possible.

QUANTITIES.

Five plants at ten rate; fifty plants at one hundred rate; and five hundred plants at one thousand rate.

BROAD-LEAVED EVERGREENS

While our plantings have not been as extensive as some of the southern nurseries, we have selected a few of the more hardy evergreens of this type, and offer them to the trade at the lowest figure possible to make and hold quality to a high standard.

Key: B. R., bare roots; B&B, balled and burlapped.

ABELIA GRANDIFLORA. Glossy Abelia.

Probably the most useful evergreen in Southern plantings. Rich, glossy, green foliage with plenty of pink tinted flowers from late spring until frost.

COLLECTED NATIVE DECIDUOUS TREES AND SHRUBS

In the following list we have included practically all the worthwhile native plants, listing them in both lining out and larger grades. This list has been compiled by hard study, and not thrown together in a haphazard way, and we hope you will be able to get at least some benefit from looking it over. Nothing is perfect, and we would appreciate your criticisms as well as your recommendations of our efforts. Each plant listed has been positively identified to our satisfaction.

Key: S—seedlings; Div.—rooted divisions; L.—rooted layers; Sel.—selected; Br.—branched; Cl.—clumps; B & B—balled and burlapped.

ACER NEGUNDO. Boxelder.

NATIVE EVERGREENS

Key: S—seedlings; Sel.—selected; B & B—balled and burlapped.

We do not carry this stock in storage, and your order is collected specifically for you. In collecting, we do not dig these plants on dry cold days. They are handled by experienced collectors who take pride in their work. Bare root stock is carefully puddled in mud made from woods-soil, as we have found that the acids in this are far superior to clay in preserving the vitality of the plant. We advise shipment by express of bare root plants, but will pack for freight shipment if desired.

ILEX OPACA. American Holly.

One of the hardier varieties of American Holly. Most of the stock sold as lining out material will eventually bear berries. Those listed as selected understocks will be well rooted, uniform plants—something you will appreciate.

HARDY NATIVE FERNS

Many of our native plants fully compensate for the absence of flowers by the beauty of their foliage. We are certain that no class of plants has more beautiful foliage than the fern. Even their method of reproduction is such that it gave birth in olden times to various legends and superstitions. But in this day when such superstitions are no longer recognized, their worth is real, when properly arranged in your plantings.

We list only a few of the best and most hardy varieties, which

can be had at a reasonable cost. The best season for planting is just as soon as they become dormant in the Fall. However, plantings can be made successfully in late Spring if given more attention in their first growing season. Why not fill that shady nook with a fern collection?

ADIANTUM CAPILLUS-VENERIS. Venus-hair Fern.

Similar to the Maidenhair fern. Slender, erect to 1 foot high. Prefers moist rocky locations. Deciduous.

	Per 10	Per 100	Per 1000
Large size clumps.....	\$ 1.00	\$ 7.50	\$ 60.00
Medium clumps.....	.50	3.00	20.00

ADIANTUM PEDATUM. American Maidenhair Fern.

Fronds 10 to 20 inches high, nearly circular in outline. Stems dark and shining, erect and forked at summit, each side bearing its share of dark green leaves. Deciduous.

Large size clumps.....	\$ 1.00	\$ 7.50	\$ 60.00
Medium div.....	.50	3.00	20.00

ASPLENIUM PLATYNEURON. Ebony Spleenwort.

Fronds upright from 10 to 20 inches high, growing in small tufts. A dainty little evergreen fern adapted to dry shady locations.

Large size clumps.....	\$.75	\$ 6.00	\$ 45.00
Small size clumps.....	.50	\$ 3.00	\$ 20.00

ASPLENIUM TRICHOMANES. Maidenhair Spleenwort.

Fronds rarely over 8 inches long, spreading in tufts. Native to shaded locations. Almost evergreen.

Small clumps.....	\$.50	\$ 3.00	\$ 20.00
-------------------	--------	---------	----------

BOTRYCHIUM VIRGINIANUM. Rattlesnake Fern.

A single stalk surmounted by a single frond, broadly triangular, commonly about 12 inches in height, rarely to 3 feet. Grows in good fertile, shady location. Deciduous.

Average plants.....	\$.75	\$ 6.00	\$ 45.00
---------------------	--------	---------	----------

CAMPTOSORUS RHIZOPHYLLUS. Walking-fern.

Fronds 4 to 12 inches long, lobed at base forming clumps. Its peculiarity is that the new plants form by the tips of the fronds taking roots.

Average plants.....	\$ 1.00	\$ 7.50	\$ 60.00
---------------------	---------	---------	----------

CYSTOPTERIS BULBIFERA. Berry Bladderfern.

Fronds one to three feet long, widest at base, gradually tapering to tip. A fern that has delicate, dark green foliage. Excellent in damp shady location.

Heavy clumps.....	\$ 1.00	\$ 7.50	\$ 60.00
Small div.....	.50	\$ 3.00	\$ 20.00

DENNSTEDTIA PUNCTILOBULA. Hayscented Fern.

A good, hardy fern with leaves to 3 feet long and 9 inches wide at base. Widely planted in wild-gardens. One of the best.

Heavy clumps.....	\$ 1.25	\$ 9.00	
Small plants.....	.50	3.00	20.00

DRYOPTERIS MARGINALIS. Leather Woodfern.

Leaves in crowns to 2 1-2 feet long. Native to open woods and requires no special treatment other than shade and woods-soil. Evergreen.

Heavy clumps.....	\$ 1.00	\$ 7.00	\$ 60.00
-------------------	---------	---------	----------

DRYOPTERIS SPINULOSA. Toothed Woodfern.

Fronds 1 to 3 feet long, finely cut with a delicate, lace-like effect. Found in rich rocky woods. Mature fronds are not erect.

	Per 10	Per 100	Per 1000
Heavy clumps.....	\$ 1.00	\$ 7.00	\$ 60.00

OSMUNDA CINNAMOMAE. Cinnamon Fern.

An erect fern with widely different fertile and sterile fronds. Sterile fronds are often 6 feet in height and disappear in early Summer, leaving the very attractive fertile fronds, which are often 4 feet in height. One of the best.

Extra heavy clumps.....	\$ 1.50	\$ 12.00	
Heavy clumps.....	1.00	7.50	60.00
Lighter clumps.....	.50	3.00	20.00

OSMUNDA REGALIS. Royal Fern.

From 2 to 6 feet tall. A standard variety of deciduous ferns that have rather coarse foliage, the upper part forming spore-bearing plumes. Easily planted.

Extra heavy clumps.....	\$ 1.50	\$ 12.00	
Heavy clumps.....	1.00	7.50	60.00
Lighter clumps.....	.50	3.00	20.00

PELLAEA ATROPURPUREA. Purple Cliffbrake.

A fern growing on rocks in limestone regions with purplish-green fronds of varying height from 4 to 24 inches. Should be treated with lime when planted in almost any soil.

Average plants.....	\$ 1.00	\$ 7.50	\$ 60.00
---------------------	---------	---------	----------

POLYPODIUM VULGARE. Common Polypody.

Rarely a success in open soil, but can be planted in rock crevices, rock walls and in moss beds. Multiplies rapidly, and grows in colonies. Rarely 12 inches tall.

Average plants.....	\$.50	\$ 3.00	\$ 20.00
---------------------	--------	---------	----------

POLYSTICHUM ACROSTICHOIDES. Christmas Fern.

An evergreen fern that is hardy in the Canadian woods. Fronds to 2 feet long, and 5 inches wide. No collection is complete without it. Our extra heavy clumps are unusually nice.

Extra heavy clumps.....	\$ 1.50	\$ 12.00	\$ 90.00
Heavy clumps.....	1.00	7.50	60.00
Light plants.....		1.25	9.00

NATIVE TREE SEEDS

We are not seedsmen, and are not prepared to care for seeds in quantity for any length of time, but in order to accomodate our customers who buy seeds in quantity and have storage facilities, we are offering the following list at prices we hope will be attractive. Attention of seedsmen is also called to the quantity prices we are making as a bid for their orders.

Ripening periods are given, and you should have your order in before seeds mature, so that we may have our collectors locate the amount required.

These prices are made subject to crop conditions, and we obligate ourselves in no way to fill your order, in case of crop failure, shortage, damage by weather conditions, or any other cause that would incur excess expenses, but will make every reasonable effort to fill your orders.
